## OH-34MV Overhead Calculator Emulates TI-34 MultiView

\$79.95

• MultiView Display. View multiple calculations at the same time, plus math expressions and symbols in standard mathematical notation. • MultiView Calculations. Enter more than one calculation, compare results and explore patterns, all on the same screen. View fraction computations in familiar textbook format. • Toggle Key. Quickly view fractions and decimals in alternate forms. "Toggle" the answers with one button to see outcomes in different representations. • Scrolling & Editing. Scroll through entries and investigate critical patterns. • Standard Mathematical Notation. Expressions in the Multiview Display appear exactly as in textbooks. • Scientific Notation Input. The new "x10n" feature replaces the EE feature on current models. • Scientific Notation Output. View scientific notation with the proper superscripted exponents and see the output in scientific notation. • Menus. Easy to read and navigate menus similar to those on a graphing calculator. • Data/List Editor. New Conversions in Lists feature with the Data/List Editor helps students compare data. The new TI-34 Multiview calculator is designed specifically for middle grades math: • In response to educator feedback, the square root key is more accessible for performing key calculations quickly. • Ideal for Middle Grades Math, Pre-Algebra, Algebra 1 & 2, Geometry, General Science & Trigonometry.
